# RuleSoft

CREATE QUOTES & DESIGNS IN RECORD TIME

RuleSoft has enabled both large and small companies to increase revenues and decrease costs by automating the way they sell and process orders for configurable, multi-option, and customizable products.

RuleSoft is a configurable automation platform that enables companies to efficiently quote and process orders for customizable products.

We provide unique configurations for complex products. Apply rules and logic to easily allow users to maintain and develop product configurations.

EASILY DESIGN CUSTOM WIZARD INPUT SCREENS GIVING NON-TECHNICAL USERS THE ABILITY TO GENERATE QUOTES, DRAWINGS, 3D MODELS AND BILLS OF MATERIALS.

Simplify your business processes, eliminate errors from designing configurations manually and address the industry need for engineer-to-order products by automating the tasks normally associated to design and engineering professionals. RuleSoft allows users to quickly output CAD models, drawings, quotes, orders and manufacturing plans for engineer-to-order products helping the company become more profitable, faster.
